

May 26, 1973

Dear Sir,

Leland Haws is going to put sprinklers in his ranch up along the Boulder creek.

He has  $2\frac{3}{4}$  second feet of water more are less. When he puts sprinklers in he wan't use all this water, he is planning on taking it to his other ranches.

I use this water. This water runs of his land and I put it in a pond and pump it out on my land. I have used this water sense 1950 and have had it in a sprinkler system for 7 or 8 years.

So I am writing this letter as a protest. I want him to leave this water where it is.

Yours truly,

Burns O. Ormond
